SUMMARY

Computer Science Engineering student with hands-on experience building full-stack web applications using React.js, Django, Node.js, and MongoDB. Strong foundation in Data Structures and Algorithms with 400+ coding problems solved. Proven ability to develop responsive user interfaces, RESTful APIs, and scalable backend systems.

EDUCATION

Kingston Engineering College | CGPA: 8.0/10

Vellore, TN, India

Bachelor of Engineering in Computer Science and Engineering

Expected 2027

- **Core Coursework:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Cloud Computing, Operating Systems, Computer Networks

Gangadhara Matric. Hr. Sec. School

Ranipet, TN, India

Higher Secondary Certificate (HSC) | Computer Science Group

April 2023

- **Percentage:** 87%

EXPERIENCE

Indian Institute of Technology (IIT), Ropar

Dec 2025 – Jan 2026

Software Engineering Intern

Virtual

- Engineered responsive web interfaces utilizing HTML5, CSS3, and JavaScript, optimizing UI performance and driving enhanced cross-browser user retention.
- Architected robust backend services utilizing Django and MongoDB; orchestrated version control via Git in a highly collaborative open-source ecosystem.
- Integrated Django backend APIs with MongoDB databases, ensuring reliable data storage, seamless communication, and stable core application functionality.

PROJECTS

Bolt social media | React.js, Node.js, Express.js, MongoDB | [GitHub](#)

Mar 2026 – Jun 2026

- Developed a full-stack MERN social networking platform with real-time messaging, media sharing, user profiles, stories, and connection management.
- Implemented Server-Sent Events (SSE) for lightweight real-time chat and used Redux Toolkit for efficient global state management and optimistic UI updates.
- Integrated a Groq-powered AI assistant with conversation memory, Clerk authentication, ImageKit media delivery, and Inngest-based background processing.

E-Commerce Web Application | React.js, Tailwind CSS, Node.js | [GitHub](#)

Oct 2023 – Dec 2023

- Developed a highly responsive, scalable e-commerce platform leveraging React.js for the frontend and Tailwind CSS for rapid UI prototyping.
- Implemented client-side routing via React Router and engineered optimized state management logic to facilitate seamless cart operations and sub-second dynamic product filtering.

ACHIEVEMENTS

Competitive Programming: Solved 400+ algorithmic and data structure problems across LeetCode and GeeksforGeeks. Achieved a 1800+ contest rating and earned the Knight Badge on LeetCode through competitive programming contests.

Technical Events: Won 12 First Prizes and 2 Runner-Up finishes in inter-college coding, debugging, and technical symposium events.

NPTEL Certifications: Secured 2 Gold Medals (Programming in Java 96%, Python for Data Science 91%) and 3 Silver Medals (Data Structures & Algorithms using Python 85%, Joy of Computing 85%, Programming in Modern C++ 81%,).

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C++, Java, SQL, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Django, Bootstrap, Tailwind CSS

Databases & Tools: MongoDB, MySQL, Git, GitHub, RESTful APIs, VS Code
